Description	GSK-3 inhibitor 1 (compound core 3) is a GSK-3 inhibitor that induces stem/progenitor cell self-renewal (e.g. induces stem/progenitor cell proliferation while maintaining the ability to differentiate into tissue cells in the progeny) <sup>[1][2]</sup> .		
IC <sub>50</sub> & Target	GSK-3		
In Vitro	GSK-3 inhibitor 1 can be used to induce, promote or enhance the growth, proliferation or regeneration of inner ear tissues such as inner ear supporting cells or inner ear hair cells <sup>[2]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
