

ARV-393

Cat. No.:	HY-158105
CAS No.:	2851885-95-3
Molecular Formula:	C ₄₆ H ₅₃ ClFN ₉ O ₇
Molecular Weight:	898.42
Target:	PROTACs; BCL6
Pathway:	PROTAC; Immunology/Inflammation
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	ARV-393 is an orally active PROTAC that utilizes the ubiquitin-proteasome system to target the degradation of BCL6. ARV-393 consists of ligand conjugates targeting BCL6 and the E3 ligase cereblon, respectively. ARV-393 has DC ₅₀ and GI ₅₀ values of <1 nM in multiple cell lines of diffuse large B-cell lymphoma (DLBCL) and Burkitt lymphoma (BL). ARV-393 also demonstrated considerable tumor suppressor activity in tumor xenograft models. ARV-393 is being studied to inhibit non-Hodgkin lymphoma.
IC ₅₀ & Target	BCL6 ^[1]
