

Cellulase

Cat. No.:	HY-B2220		
CAS No.:	9012-54-8		
Target:	Others		
Pathway:	Others		
Storage:	Powder	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

Cellulase

SOLVENT & SOLUBILITY

In Vitro	H ₂ O : ≥ 25 mg/mL * "≥" means soluble, but saturation unknown.
----------	---

BIOLOGICAL ACTIVITY

Description	Cellulase is an enzyme catalyzing the hydrolysis of certain linkages in cellulose and other carbohydrates.
In Vitro	Cellulase exhibits significant antibiofilm activity against <i>B. cepacia</i> , but does not have much action on its growth ^[1] . Cellulase and protease leads to the CST increasing in the case of activated sludge, but the effect of cellulase is lower than that of protease at the same concentration. Cellulase decreases the particle size of activated sludge. Cellulase has no significantly effect on sludge dewatering in terms of solid concentration after centrifugation ^[2] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
