

## BODIPY 581/591 C11

Cat. No.:	HY-D1301
CAS No.:	217075-36-0
Molecular Formula:	C <sub>30</sub> H <sub>35</sub> BF <sub>2</sub> N <sub>2</sub> O <sub>2</sub>
Molecular Weight:	504.42
Target:	Ferroptosis; Fluorescent Dye
Pathway:	Apoptosis; Others
Storage:	-20°C, protect from light * In solvent : -80°C, 6 months; -20°C, 1 month (protect from light)

### SOLVENT & SOLUBILITY

#### In Vitro

DMSO : 12.5 mg/mL (24.78 mM; Need ultrasonic)

	Solvent Concentration	Mass	1 mg	5 mg	10 mg
Preparing Stock Solutions	1 mM		1.9825 mL	9.9124 mL	19.8247 mL
	5 mM		0.3965 mL	1.9825 mL	3.9649 mL
	10 mM		0.1982 mL	0.9912 mL	1.9825 mL

Please refer to the solubility information to select the appropriate solvent.

### BIOLOGICAL ACTIVITY

#### Description

BODIPY 581/591 C11 is a BODIPY borofluoroprene derivative with good light stability and low fluorescence artifacts. BODIPY 581/591 C11 can be used for study lipid peroxidation and antioxidant properties in living cells, or detect ferroptosis by reaction with hydroxyl radicals. BODIPY 581/591 C11 is emitted at 591 nm (reduced prototype), or redshifted to 510 nm (oxidized type). The excitation wavelengths were 581 nm (reduced prototype) and 500 nm (oxidized type)<sup>[1]</sup>.

#### In Vitro

Preparation of the stock solution  
Dissolve 1mg BODIPY 581/591 C11 in 0.1983 mL DMSO to obtain 10 mM of BODIPY 581/591 C11.  
Note: It is recommended to store the stock solution at -20°C -80°C away from light and avoid repetitive freeze-thaw cycles.

1.2 Preparation of BODIPY 581/591 C11 working solution  
Dilute the stock solution in serum-free cell culture medium or PBS to obtain 2-10 μM of BODIPY 581/591 C11 working solution.  
Note: Please adjust the concentration of BODIPY 581/591 C11 working solution according to the actual situation.

Cell staining  
2.1 Cell preparation:  
For suspension cells: Centrifuge at 1000 g at 4°C for 3-5 minutes and then discard the supernatant. Wash twice with PBS, 5 minutes each time.

For adherent cells: Discard the cell culture medium, and add trypsin to dissociate cells to make a single-cell suspension. Centrifuge at 1000 g at 4°C for 3-5 minutes and then discard the supernatant. Wash twice with PBS, 5 minutes each time.

2.2 Add 1 mL of BODIPY 581/591 C11 working solution, and then incubate at room temperature for 30 minutes.

2.3 Centrifuge at 400 g at 4°C for 3-4 minutes and then discard the supernatant.

2.4 Wash twice with PBS, 5 minutes each time.

2.5 Resuspend cells with serum-free cell culture medium or PBS, and then detect by fluorescence microscope or flow cytometer.

#### Precautions

1. It is recommended to store the stock solution at -20°C or -80°C away from light and avoid repetitive freeze-thaw cycles.
  2. Please adjust the concentration of BODIPY 581/591 C11 working solution according to the actual situation.
  3. This product is for R&D use only, not for drug, household, or other uses.
  4. For your safety and health, please wear a lab coat and disposable gloves to operate.
