BIOLOGICAL ACTIVITY

Description	FTSDVSKQMEEEAVRLFIEWLKNGGPSSGAPPPS is an Exendin-4 peptide derivative.
In Vitro	Exendin-4 is a pure GLP-1 receptor agonist. Exendin-4 peptide derivatives are structurally derived from Exendin-4 and may relate to dual GLP-1/glucagon receptor agonists. Their medical use, for example in the treatment of disorders of the metabolic syndrome, including diabetes and obesity, as well as for reduction of excess food intake. These dual GLP-1/glucagon receptor agonists show reduced activity on the GIP receptor to reduce the risk of hypoglycemia ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
