

## Adiponectin/Acrp30 Protein, Mouse (HEK293, His)

Cat. No.:	HY-P7461
Synonyms:	rMuAdiponectin, His; Acrp30; ADIPOQ
Species:	Mouse
Source:	HEK293
Accession:	Q60994 (E18-N247)
Gene ID:	11450
Molecular Weight:	Approximately 27-33 kDa due to the glycosylation

### PROPERTIES

AA Sequence	<pre> EDDVTTTEEL    APALVPPPKG    TCAGWMAGIP    GHPGHNGTPG RDGRDGTPE     KGEKGDAGLL   GPKGETGDVG    MTGAEGPRGF PGTPGRKGE     GEAAVYRSA    FSVGLETRVT    VPNVPIRFTK IFYNQQNHVD    GSTGKFYCN    PGLYYSYHI     TVYMKDVKVS LFKKDKAVLF    TYDQYQEKNV   DQASGSVLLH    LEVGDQVWLQ VYGDGDHNGL    YADNVNDSTF   TGFLLYHDTN </pre>
Biological Activity	Measured by its ability to inhibit glucose production by rat hepatocytes. The IC <sub>50</sub> for this effect is ≤0.673 μg/mL, corresponding to a specific activity is ≥1.486×10 <sup>3</sup> units/mg.
Appearance	Lyophilized powder
Formulation	Lyophilized after extensive dialysis against 20 mM PB, 150 mM NaCl, pH 7.4.
Endotoxin Level	<1 EU/μg, determined by LAL method.
Reconstitution	It is not recommended to reconstitute to a concentration less than 100 μg/mL in ddH <sub>2</sub> O. For long term storage it is recommended to add a carrier protein (0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose).
Storage & Stability	Stored at -20°C for 2 years. After reconstitution, it is stable at 4°C for 1 week or -20°C for longer (with carrier protein). It is recommended to freeze aliquots at -20°C or -80°C for extended storage.
Shipping	Room temperature in continental US; may vary elsewhere.

### DESCRIPTION

Background	Adiponectin has direct actions in liver, skeletal muscle, and the vasculature. Adiponectin exists in the circulation as varying molecular weight forms, produced by multimerization. Several endoplasmic reticulum ER-associated proteins, including ER oxidoreductase 1-α (Ero1-α), ER resident protein 44 (ERp44), disulfide-bond A oxidoreductase-like protein (DsbA-L), and
------------	---

---

glucose-regulated protein 94 (GPR94), have recently been found to be involved in the assembly and secretion of higher-order adiponectin complexes. Adiponectin administration in humans and rodents has insulin-sensitizing, anti-atherogenic, and anti-inflammatory effects, and, in certain settings, also decreases body weight<sup>[1]</sup>.
