

4-Hydroxybenzoate sodium

| | |
|--------------------|--|
| Cat. No.: | HY-W010164 |
| CAS No.: | 114-63-6 |
| Molecular Formula: | C ₇ H ₅ NaO ₃ |
| Molecular Weight: | 160.1 |
| Target: | Biochemical Assay Reagents |
| Pathway: | Others |
| Storage: | 4°C, stored under nitrogen, away from moisture * In solvent : -80°C, 6 months; -20°C, 1 month (stored under nitrogen, away from moisture) |

BIOLOGICAL ACTIVITY

| | |
|--------------------|---|
| Description | 4-Hydroxybenzoate sodium, also known as sodium p-hydroxybenzoate or sodium paraben, is commonly used as a food preservative and cosmetic preservative. It can also be used as an additive in a variety of other products, including pharmaceuticals, personal care products, and industrial products. Additionally, 4-Hydroxybenzoate sodium has the potential to function as xenoestrogens, which may mimic the effects of estrogen in the body and affect hormonal balance. |
| In Vitro | Sodium 4-hydroxybenzoate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only. |

Caution: Product has not been fully validated for medical applications. For research use only.
