BIOLOGICAL ACTIVITY

Description	trans-2,cis-6-Nonadienal- ¹³ C ₂ is ¹³ C labeled 4-Ethylphenol (HY-W012836). 4-Ethylphenol is a volatile phenolic compound associated with off-odour in wine.
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . trans-2,cis-6-Nonadienal is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.
