ONO-7300243

Cat. No.: HY-100882
CAS No.: 638132-34-0
Molecular Formula: C₂₈H₃₁NO₅
Molecular Weight: 461.55
Target: LPL Receptor
Pathway: GPCR/G Protein
Storage:
- Powder: -20°C 3 years
- Powder: 4°C 2 years
- In solvent: -80°C 6 months
- In solvent: -20°C 1 month

Solvent & Solubility

In Vitro:
10 mM in DMSO

BIOLOGICAL ACTIVITY

Description
ONO-7300243 is a novel, potent lysophosphatidic acid receptor 1 (LPA1) antagonist with IC₅₀ of 0.16 μM.

IC₅₀ & Target
IC₅₀: 0.19-0.13 μM (LPA1)[1]

In Vitro
ONO-7300243 shows modest in vitro activity (IC₅₀=0.16 μM). ONO-7300243 exhibits almost identical levels of antagonist activity in vitro[1].

In Vivo
ONO-7300243 shows good efficacy in vivo. The oral dosing of 17a at 30 mg/kg leads to reduced intraurethral pressure in rats. ONO-7300243 shows strong effects in vivo (88% inhibition at 10 mg/kg i.d., 62% inhibition at 3 mg/kg i.d.) compared with compound 12g. The results reveal that ONO-7300243 shows good membrane permeability and good metabolic stability against rat liver microsomes (MS). ONO-7300243 exhibits good selectivity towards LPA1 over LPA2, most likely because low molecular weight and low lipophilicity lead to reduced compound promiscuity and increased selectivity. ONO-7300243 inhibits the LPA-induced IUP increase in a dose dependent manner (ID₅₀=11.6 mg/kg p.o.) up to 1 h after dosing. Significant effects are observed at 10 and 30 mg/kg (p<0.05.
vs. vehicle). ONO-7300243 (30 mg/kg, p.o.) leads to a significant decrease in the IUP in conscious rats without LPA stimulation compared with the vehicle without affecting the mean blood pressure (MBP). The results of a rat pharmacokinetic study of ONO-7300243 show that this material had a rapid clearance ($CL_{tot}=15.9 \text{ mL/min/kg}$ at 3 mg/kg i.v.) and a short half-life (0.3 h)[1].

### PROTOCOL

#### Animal Administration [1]

Rats[1]

The oral administration of ONO-7300243 (30 mg/kg, p.o.) is investigated to determine its effect on rat IUP. ONO-7300243 is studied in an LPA-induced rat intraurethral pressure (IUP) model.

MCE has not independently confirmed the accuracy of these methods. They are for reference only.
