

Sodium ionophore III

Cat. No.:	HY-101109		
CAS No.:	81686-22-8		
Molecular Formula:	C ₃₄ H ₅₂ N ₂ O ₄		
Molecular Weight:	552.79		
Target:	Sodium Channel		
Pathway:	Membrane Transporter/Ion Channel		
Storage:	Powder	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

SOLVENT & SOLUBILITY

In Vitro

DMSO : 2 mg/mL (3.62 mM; ultrasonic and warming and heat to 60°C)
 H₂O : 1 mg/mL (1.81 mM; ultrasonic and warming and heat to 80°C)

Preparing Stock Solutions	Solvent Concentration	Mass		
		1 mg	5 mg	10 mg
	1 mM	1.8090 mL	9.0450 mL	18.0901 mL
	5 mM	---	---	---
	10 mM	---	---	---

Please refer to the solubility information to select the appropriate solvent.

In Vivo

1. Add each solvent one by one: corn oil
 Solubility: 2 mg/mL (3.62 mM); Suspended solution; Need ultrasonic

BIOLOGICAL ACTIVITY

Description

Sodium ionophore III (ETH2120) is a Na⁺ ionophore suitable for the assay of sodium activity in blood, plasma, serum. etc.

In Vitro

Preincubation of the cells with the Na⁺ ionophore sodium ionophore III not only stimulated caffeine reduction, but completely abolished ATP synthesis. Addition of sodium ionophore III to cells in the steady state of caffeine reduction immediately dissipated the intracellular ATP level^[1]. Lactate-sulfate grown cells are insensitive to the Na⁺ ionophore, ETH2120^[2]. Sodium ionophore III ligand is a very effective receptor for the Eu³⁺ and Am³⁺ cations and can be considered as a potential extraction agent for nuclear waste treatment^[3].

MCE has not independently confirmed the accuracy of these methods. They are for reference only.
