

## Peliglitazar racemate

Cat. No.:	HY-101738A
CAS No.:	331744-72-0
Molecular Formula:	C <sub>30</sub> H <sub>30</sub> N <sub>2</sub> O <sub>7</sub>
Molecular Weight:	530.57
Target:	PPAR
Pathway:	Cell Cycle/DNA Damage; Vitamin D Related/Nuclear Receptor
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

Description	Peliglitazar racemate is the racemate of Peliglitazar. Peliglitazar is a novel dual $\alpha/\gamma$ PPAR activator.
In Vivo	Peliglitazar, is a novel dual $\alpha/\gamma$ peroxisome proliferator-activated receptor (PPAR) activator. It has been shown that Peliglitazar has both glucose and lipid-lowering effects when tested in animal models of diabetes and dyslipidemia <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
