E-7386

Cat. No.: HY-111386
CAS No.: 1799824-08-0
Molecular Formula: C₃₉H₄₈FN₉O₄
Molecular Weight: 725.85
Target: Epigenetic Reader Domain
Pathway: Epigenetics
Storage: Powder -20°C 3 years
        4°C 2 years
        In solvent -80°C 6 months
        -20°C 1 month

SOLVENT & SOLUBILITY

In Vitro
DMSO: 125 mg/mL (172.21 mM; Need ultrasonic)

Please refer to the solubility information to select the appropriate solvent.

In Vivo
1. Add each solvent one by one: 10% DMSO >> 40% PEG300 >> 5% Tween-80 >> 45% saline
   Solubility: ≥ 2.08 mg/mL (2.87 mM); Clear solution
2. Add each solvent one by one: 10% DMSO >> 90% (20% SBE-β-CD in saline)
   Solubility: ≥ 2.08 mg/mL (2.87 mM); Clear solution
3. Add each solvent one by one: 10% DMSO >> 90% corn oil
   Solubility: ≥ 2.08 mg/mL (2.87 mM); Clear solution

BIOLOGICAL ACTIVITY

Description
E-7386 is an orally active CBP/beta-catenin modulator.

IC₅₀ & Target
CBP/beta-catenin

In Vivo
E-7386 is an orally active CBP/beta-catenin modulator which can induce T cells infiltration into tumor and enhance antitumor activity of anti-PD-1 mAb in Wnt1 tumor syngeneic mice model. E-7386 shows significant antitumor activity in Wnt1 model. Infiltration of T cells is limited in vehicle control group, but T cell infiltration into tumors is clearly observed in
E-7386 treatment group\textsuperscript{[1]}. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

**PROTOCOL**

**Animal Administration**\textsuperscript{[1]}

The mice are treated with E-7386 (50 mg/kg, orally, BID) for three weeks. Tumor diameters are measured with digital calipers, and the tumor volume in mm\textsuperscript{3} is calculated. Immunohistochemical (IHC) analysis is evaluated for tumor-infiltrating T cells\textsuperscript{[1]}. MCE has not independently confirmed the accuracy of these methods. They are for reference only.
