

## Pertussis Toxin

Cat. No.:	HY-112779
CAS No.:	70323-44-3
Target:	Others
Pathway:	Others
Storage:	Store at 4°C, do not freeze

## Pertussis Toxin

### BIOLOGICAL ACTIVITY

<b>Description</b>	Pertussis Toxin is a protein-based AB <sub>5</sub> -type exotoxin produced by the bacterium <i>Bordetella pertussis</i> , which causes whooping cough. Pertussis Toxin inhibits G protein-coupled receptor (GPR) signaling through Gi proteins <sup>[1][2][3]</sup> .
<b>In Vitro</b>	Pertussis toxin is a secreted protein exotoxin and an important virulence factor produced exclusively by <i>B. pertussis</i> <sup>[1]</sup> . Pertussis toxin (PTX; 100 ng/ml; 12 h) completely suppresses the increase in G protein-coupled receptor kinase 2 (GRK2)-dependent migration in HeLa cells <sup>[2]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
