BIOLOGICAL ACTIVITY

Description
Triptorelin is a GnRH agonist shown to inhibit estradiol-induced cancer cell proliferation. In vivo: (1) Triptorelin can improve the pregnancy rate by 12% to 15% in ewes and downregulate ovarian GnRHR-I expression of female rats, especially in late-growing follicles. (2) Triptorelin immunity blocked EET and UWT, inhibited uterine growth and development and enhance the expression levels of ESR1, LHR, and FSHR proteins.
