

## Globosuxanthone A

Cat. No.:	HY-125727
CAS No.:	917091-74-8
Molecular Formula:	C <sub>15</sub> H <sub>12</sub> O <sub>7</sub>
Molecular Weight:	304.25
Target:	Fungal
Pathway:	Anti-infection
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	Globosuxanthone A is a dihydroxanthone with obvious antifungal activity towards <i>Fusarium graminearum</i> , <i>Fusarium solani</i> , and <i>Botrytis cinerea</i> with MIC values of 4, 8, and 16 µg/mL, respectively. Anticancer activity <sup>[1][2]</sup> .
<b>In Vitro</b>	Globosuxanthone A shows cytotoxicities against NCI-H460, MCF-7, SF-268, PC-3, PC-3M, LNCaP, DU-145 cells (IC <sub>50</sub> =0.65-3.6 µM) <sup>[1]</sup> . Globosuxanthone A impairs cell cycle progression of NCI-H460 and PC-3M cells leading to accumulation in the G2/M and S phases <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
