

## Pyrene-amido-PEG4-CH<sub>2</sub>CH<sub>2</sub>COOH

<b>Cat. No.:</b>	HY-130397
<b>CAS No.:</b>	1817735-34-4
<b>Molecular Formula:</b>	C <sub>28</sub> H <sub>33</sub> NO <sub>7</sub>
<b>Molecular Weight:</b>	495.56
<b>Target:</b>	PROTAC Linkers
<b>Pathway:</b>	PROTAC
<b>Storage:</b>	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	Pyrene-amido-PEG4-CH <sub>2</sub> CH <sub>2</sub> COOH is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs <sup>[1]</sup> .	
<b>IC<sub>50</sub> &amp; Target</b>	PEGs	Alkyl/ether
<b>In Vitro</b>	PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
