

## HS-PEG7-CH2CH2NH2

|                    |   |
|--------------------|---|
| Cat. No.:          | HY-130873   |
| Molecular Formula: | C <sub>16</sub> H <sub>35</sub> NO <sub>7</sub> S   |
| Molecular Weight:  | 385.52  |
| Target:            | PROTAC Linker   |
| Pathway:           | PROTAC  |
| Storage:           | Please store the product under the recommended conditions in the Certificate of Analysis. |

### BIOLOGICAL ACTIVITY

|                           |  |
|---------------------------|--|
| Description               | HS-PEG7-CH <sub>2</sub> CH <sub>2</sub> NH <sub>2</sub> is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs <sup>[1]</sup> .   |
| IC <sub>50</sub> & Target | PEGs   |
| In Vitro                  | PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only. |
