### BIOLOGICAL ACTIVITY

Description	(Z)-2-decenoic acid (cis-2-Decenoic acid) is an unsaturated fatty acid produced by <i>Pseudomonas aeruginosa</i> . (Z)-2-decenoic acid induces a dispersion response in biofilms formed by a range of gram-negative bacteria, including <i>P. aeruginosa</i> , and by gram-positive bacteria. (Z)-2-decenoic acid inhibits biofilm development <sup>[1]</sup> .
In Vitro	When added exogenously to <i>P. aeruginosa</i> PAO1 biofilms at a native concentration of 2.5 nM, (Z)-2-decenoic acid (cis-2-Decenoic acid) is shown to induce the dispersion of biofilm microcolonies <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
