

## Atorvastatin Epoxy Tetrahydrofuran Impurity

<b>Cat. No.:</b>	HY-136185
<b>CAS No.:</b>	873950-19-7
<b>Molecular Formula:</b>	C <sub>26</sub> H <sub>24</sub> FNO <sub>5</sub>
<b>Molecular Weight:</b>	449.47
<b>Target:</b>	Others
<b>Pathway:</b>	Others
<b>Storage:</b>	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	Atorvastatin Epoxy Tetrahydrofuran Impurity is an impurity isolated oxidative degradation products of Atorvastatin (HY-B0589) <sup>[1]</sup> . Atorvastatin is an orally active HMG-CoA reductase inhibitor, has the ability to effectively decrease blood lipids.
<b>In Vitro</b>	Atorvastatin treatment decreases apoptosis of myocardial cells by down-regulating GRP78, caspase-12 and CHOP expression in myocardial cells after myocardial infarction, and the endoplasmic reticulum (ER) stress is activated in response to heart failure and angiotensin II (Ang II) stimulation. MCE has not independently confirmed the accuracy of these methods. They are for reference only.
