

4-Hydroxyphenylbutazone

Cat. No.:	HY-139199
CAS No.:	16860-43-8
Molecular Formula:	C ₁₉ H ₂₀ N ₂ O ₃
Molecular Weight:	324.37
Target:	Drug Metabolite
Pathway:	Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	4-Hydroxyphenylbutazone is a metabolite of Phenylbutazone. Phenylbutazone, a nonsteroidal anti-inflammatory drug (NSAID), is an efficient reducing cofactor for the peroxidase activity of prostaglandin H synthase (PHS) ^[1] .
In Vitro	4-hydroxyphenylbutazone is isolated from incubations of phenylbutazone with either ram seminal vesicle microsomes or horseradish peroxidase. 4-hydroxyphenylbutazone is ineffective inhibitor of PHS cyclooxygenase ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
