

## DBCO-PEG6-amine

Cat. No.:	HY-140284
CAS No.:	2353409-98-8
Molecular Formula:	C <sub>33</sub> H <sub>45</sub> N <sub>3</sub> O <sub>8</sub>
Molecular Weight:	611.73
Target:	PROTAC Linkers
Pathway:	PROTAC
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

Description	DBCO-PEG6-amine is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs <sup>[1]</sup> . DBCO-PEG6-amine is a click chemistry reagent, it contains a DBCO group that can undergo strain-promoted alkyne-azide cycloaddition (SPAAC) with molecules containing Azide groups.	
IC <sub>50</sub> & Target	PEGs	Alkyl/ether
In Vitro	PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
