

N-(PEG1-OH)-N-Boc-PEG2-propargyl

Cat. No.:	HY-140569
CAS No.:	2100306-85-0
Molecular Formula:	C ₁₆ H ₂₉ NO ₆
Molecular Weight:	331.4
Target:	PROTAC Linkers
Pathway:	PROTAC
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	N-(PEG1-OH)-N-Boc-PEG2-propargyl is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs ^[1] . N-(PEG1-OH)-N-Boc-PEG2-propargyl is a click chemistry reagent, it contains an Alkyne group and can undergo copper-catalyzed azide-alkyne cycloaddition (CuAAC) with molecules containing Azide groups.	
IC ₅₀ & Target	PEGs	Alkyl/ether
In Vitro	PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
