TCO-PEG6-amine

| Cat. No.: | HY-141180 | | creeni |
|--------------------|-------------------------------------------------------------------------------------------|------------------------------------------------------------------------------|---------|
| CAS No.: | 2353409-94-4 | | ning |
| Molecular Formula: | C ₂₃ H ₄₄ N ₂ O ₈ | | |
| Molecular Weight: | 476.6 | $H_{N} \sim 0 \sim $ | braries |
| Target: | PROTAC Linkers | | es |
| Pathway: | PROTAC | | • |
| Storage: | Please store the product under the recommended conditions in the Certificate of Analysis. | | Protei |

| BIOLOGICAL ACTIV | BIOLOGICAL ACTIVITY | |

| Description | TCO-PEG6-amine is a PEG-based PROTAC linker can be used in the synthesis of PROTACs ^[1] . | |
| IC ₅₀ & Target | PEGs | |
| In Vitro | PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins. MCE has not independently confirmed the accuracy of these methods. They are for reference only. | |
