N-Boc-PEG36-alcohol

MedChemExpress

Cat. No.:	HY-141196	
Molecular Formula:	C ₇₇ H ₁₅₅ NO ₃₈	
Molecular Weight:	1703.04	
Target:	PROTAC Linkers	
Pathway:	PROTAC	$\sim 0^{-1} H$
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY				
Description	N-Boc-PEG36-alcohol is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs ^[1] .			
IC ₅₀ & Target	PEGs	Alkyl/ether		
In Vitro	PROTACs contain two differen	t ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for		

PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins^[1]. MCE has not independently confirmed the accuracy of these methods. They are for reference only.
