

## m-PEG5-triethoxysilane

Cat. No.:	HY-141408
CAS No.:	2243566-42-7
Molecular Formula:	C <sub>21</sub> H <sub>45</sub> NO <sub>9</sub> Si
Molecular Weight:	483.67
Target:	PROTAC Linkers
Pathway:	PROTAC
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

Description	m-PEG5-triethoxysilane is a PEG-based PROTAC linker can be used in the synthesis of PROTACs <sup>[1]</sup> .
IC <sub>50</sub> & Target	PEGs
In Vitro	PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
