Acid-PEG10-t-butyl ester

Cat. No.:	HY-143836	. 0
Molecular Formula:	C ₂₈ H ₅₄ O ₁₄	, L
Molecular Weight:	614.72	0 0
Target:	PROTAC Linkers	
Pathway:	PROTAC	$\sim \sim \sim 0$
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.	

BIOLOGICAL ACTIVITY		
Description	Acid-PEG10-t-butyl ester is a PEG-based PROTAC linker that can be used in the synthesis of PROTACs ^[1] .	
IC ₅₀ & Target	PEGs	
In Vitro	PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
