

Aripiprazole metabolite-d₆

Cat. No.:	HY-143913S
Molecular Formula:	C ₁₃ H ₉ D ₆ NO ₄
Molecular Weight:	255.3
Target:	Isotope-Labeled Compounds
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Aripiprazole metabolite-d ₆ is the deuterium labeled Aripiprazole metabolite[1].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
