

## Nortriptyline impurity 3-d3 hydrochloride

Cat. No.:	HY-144141S
Molecular Formula:	C <sub>37</sub> H <sub>35</sub> D <sub>3</sub> ClN
Molecular Weight:	535.18
Target:	Drug Metabolite; Isotope-Labeled Compounds
Pathway:	Metabolic Enzyme/Protease; Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	Nortriptyline impurity 3-d3 hydrochloride is the deuterium labeled Nortriptyline impurity 3 hydrochloride <sup>[1]</sup> .
<b>In Vitro</b>	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
