Bilastine

Cat. No.: HY-14447
CAS No.: 202189-78-4
Molecular Formula: C₂₈H₃₇N₃O₃
Molecular Weight: 463.61
Target: Histamine Receptor
Pathway: GPCR/G Protein; Immunology/Inflammation
Storage: Powder
-20°C 3 years
4°C 2 years
In solvent
-80°C 6 months
-20°C 1 month

Solvent & Solubility

In Vitro DMSO : ≥ 49.3 mg/mL (106.34 mM)
* "≥" means soluble, but saturation unknown.

BIOLOGICAL ACTIVITY

Description
Bilastine is a selective histamine H1 receptor antagonist used for treatment of allergic rhinoconjunctivitis and urticaria. Target: Histamine H1 Receptor
Bilastine binds to histamine H1-receptors as indicated by its displacement of [3H]-pyrilamine from H1-receptors expressed in guinea-pig cerebellum and human embryonic kidney (HEK) cell lines. The studies conducted on guinea-pig smooth muscle demonstrated the capability of bilastine to antagonise H1-receptors. Bilastine is selective for histamine H1-receptors as shown in receptor-binding screening conducted to determine the binding capacity of bilastine to 30 different receptors [1]. Bilastine distribution has an apparent volume of distribution of 1.29 L/kg, and has an elimination half-life of 14.5 h and plasma protein binding of 84-90% [2].
