

N-Desmethyl Selegiline-dd₅ hydrochloride

Cat. No.:	HY-150544S
CAS No.:	1217774-73-6
Molecular Formula:	C ₁₂ H ₁₁ D ₅ ClN
Molecular Weight:	214.75
Target:	Isotope-Labeled Compounds
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	N-Desmethyl Selegiline-dd ₅ hydrochloride is the deuterium labeled N-Desmethyl Selegiline hydrochloride[1]. N-Desmethyl Selegiline-d ₅ hydrochloride is a click chemistry reagent, it contains an Alkyne group and can undergo copper-catalyzed azide-alkyne cycloaddition (CuAAC) with molecules containing Azide groups.
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
