| Cat. No.: | HY-153081 |
| Target: | Fluorescent Dye |
| Pathway: | Others |
| Storage: | Solution, -20°C, 2 years |

eGFP circRNA

BIOLOGICAL ACTIVITY

Description

The eGFP circRNA will express green fluorescent protein, originally isolated from the jellyfish, *Aequorea victoria*. The eGFP is a commonly used direct detection reporter in mammalian cell culture, yielding bright green fluorescence with an emission peak at 509 nm. The eGFP circRNA is therefore ideal for monitoring and optimizing transfection efficiency and is recommended as a positive control for circular RNA transfections.
