mPEG-CHO (MW 5000)

MedChemExpress

Cat. No.: HY-155921 CAS No.: 70086-22-5 Molecular Formula: (C2H40)nC3H602 Target: Liposome Pathway: Metabolic Enzyme/Protease Storage: Please store the product under the recommended conditions in the Certificate of Analysis.			
Molecular Formula: $(C_2H_4O)_nC_3H_6O_2$ Target: Liposome Pathway: Metabolic Enzyme/Protease Storage: Please store the product under the recommended conditions in the Certificate of	Cat. No.:	HY-155921	
Target: Liposome Pathway: Metabolic Enzyme/Protease Storage: Please store the product under the recommended conditions in the Certificate of	CAS No.:	70086-22-5	
Pathway: Metabolic Enzyme/Protease Storage: Please store the product under the recommended conditions in the Certificate of	Molecular Formula:	(C ₂ H ₄ O) _n C ₃ H ₆ O ₂	-0
Storage: Please store the product under the recommended conditions in the Certificate of	Target:	Liposome	
-	Pathway:	Metabolic Enzyme/Protease	$(0)_n$
	Storage:		

BIOLOGICAL ACTIVITY		
BIOLOGICAL ACTIVITY		
Description	mPEG-CHO (MW 5000) participates in the formation of a three-dimensional porous scaffold which carries active substances	
	to form a delivery vehicle. The -CHO functional group interacts with the -NH2 functional group of the chitosan chain to form	
	a glutaraldehyde-type adduct to functionalize mPEG. This functionalization and cross-linking can affect the rigidity of the	
	delivery system, allowing slow release of the cross-linked conjugate system.
