Rifampin/KLH

BIOLOGICAL ACTIVITY

Description

Rifampin/KLH is one of protein/peptide and small molecule drug conjugates (PDCs), consisting of Rifampin (HY-B0272) and KLH. PDCs are promising targeted therapeutics with better cell permeability and drug selectivity than antibody-drug conjugates (ADCs). PDCs have been widely used in research on cancer, COVID-19, and metabolic diseases^[1].
