

AAA

Cat. No.: HY-160187
Molecular Formula: C₂₄H₃₉NNa₂O₆
Molecular Weight: 483.55
Target: Others
Pathway: Others
Storage: -20°C, protect from light, stored under nitrogen
 * In solvent : -80°C, 6 months; -20°C, 1 month (protect from light, stored under nitrogen)

SOLVENT & SOLUBILITY

In Vitro

PBS : 1 mg/mL (2.07 mM; Need ultrasonic and warming)

	Solvent Concentration	Mass	1 mg	5 mg	10 mg
Preparing Stock Solutions	1 mM		2.0680 mL	10.3402 mL	20.6804 mL
	5 mM		---	---	---
	10 mM		---	---	---

Please refer to the solubility information to select the appropriate solvent.

BIOLOGICAL ACTIVITY

Description

AAA is a potent blocker of 20-Hydroxyeicosatetraenoic acid (20-HETE) receptor that binds directly to GPR75 and prevents the increases in intracellular Ca²⁺, IP-1 and β-arrestin^[1].
