

Clevidipine-¹⁵N,_d₁₀

Cat. No.:	HY-17436S4
Molecular Formula:	C ₂₁ H ₁₃ D ₁₀ Cl ₂ ¹⁵ N ₆ O ₆
Molecular Weight:	467.37
Target:	Calcium Channel; Isotope-Labeled Compounds
Pathway:	Membrane Transporter/Ion Channel; Neuronal Signaling; Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Clevidipine- ¹⁵ N, _d ₁₀ is ¹⁵ N and deuterated labeled Clevidipine (HY-17436). Clevidipine is a short-acting dihydropyridine calcium channel antagonist (IC ₅₀ = 7.1 nM, V(H)=-40 mV).
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
