

1400W

Cat. No.:	HY-18730
CAS No.:	180001-34-7
Molecular Formula:	C ₁₀ H ₁₅ N ₃
Molecular Weight:	177.25
Target:	NO Synthase; Apoptosis
Pathway:	Immunology/Inflammation; Apoptosis
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	1400W is a slow, tight binding, and highly selective inducible nitric-oxide synthase (iNOS) inhibitor, with a K _d value ≤ 7 nM. 1400W inhibits iNOS induction in microglial cells, and reduces generation of NO, thereby mitigating oxidative stress and neuronal cell apoptosis in the rat cerebral cortex, and improving the spatial memory dysfunction caused by acute hypobaric hypoxia-reoxygenation ^{[1][2]} .
IC₅₀ & Target	Ki: 2 μM (nNOS), 50 μM (eNOS) ^[1]
In Vitro	1400W (60 μM, 1 h) reduces NO, 3-NT and MDA production in primary adult microglia, and prevents neuronal cell apoptosis in cerebral cortex ^[2] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
In Vivo	1400W (0.1-10 mg/kg, s.c., once time) inhibits the leakage of rats ileum, with an EC ₅₀ of 0.16 mg/kg ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
