

Saroglitazar-d₄

Cat. No.:	HY-19937S1
Molecular Formula:	C ₂₅ H ₂₅ D ₄ NO ₄ S
Molecular Weight:	443.59
Target:	Isotope-Labeled Compounds
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Saroglitazar-d ₄ is the deuterium-labeled Saroglitazar (HY-19937). Saroglitazar-d ₄ is a novel peroxisome proliferator-activated receptor (PPAR) agonist with predominant PPAR α and moderate PPAR γ activity with EC ₅₀ values of 0.65 pM and 3 nM in HepG2 cells, respectively.
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
