Product Data Sheet

β-D-Glucose pentaacetate-¹³C₆

Cat. No.: HY-22306S CAS No.: 213020-65-6 Molecular Formula: $C_{10}^{13}C_{6}H_{22}O_{11}$

396.3 Target: Isotope-Labeled Compounds

Pathway: Others

Molecular Weight:

Storage: Please store the product under the recommended conditions in the Certificate of

BIOLOGICAL ACTIVITY

Description	β -D-Glucose pentaacetate- 13 C ₆ is the 13 C labeled β -D-Glucose pentaacetate[1]. β -D-Glucose Pentaacetate (Penta-O-acetyl- β -D-glucopyranose) is used in biochemical reaction.
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
