

5-Hydroxyquinoline

Cat. No.:	HY-32100		
CAS No.:	578-67-6		
Molecular Formula:	C ₉ H ₇ NO		
Molecular Weight:	145.16		
Target:	Biochemical Assay Reagents		
Pathway:	Others		
Storage:	Powder	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

BIOLOGICAL ACTIVITY

Description	5-Hydroxyquinoline is an organic compound commonly used in certain chemical reactions and biological research. It can be used in the manufacture of dyes, cellulase, oxidants and passivators, etc., and is widely used in the pigment, paint and rubber industries. In addition, the compound is also used as the precursor, intermediate and metal ion complexing agent of certain drugs.
In Vitro	5-Hydroxyquinoline is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
