

1-Fluoronaphthalene

Cat. No.:	HY-32126		
CAS No.:	321-38-0		
Molecular Formula:	C ₁₀ H ₇ F		
Molecular Weight:	146.16		
Target:	Others		
Pathway:	Others		
Storage:	Pure form	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

SOLVENT & SOLUBILITY

In Vitro

DMSO : 100 mg/mL (684.18 mM; Need ultrasonic)

	Solvent Concentration	Mass	1 mg	5 mg	10 mg
Preparing Stock Solutions	1 mM		6.8418 mL	34.2091 mL	68.4182 mL
	5 mM		1.3684 mL	6.8418 mL	13.6836 mL
	10 mM		0.6842 mL	3.4209 mL	6.8418 mL

Please refer to the solubility information to select the appropriate solvent.

BIOLOGICAL ACTIVITY

Description

1-Fluoronaphthalene is an organofluorine compound derived from naphthalene derivatives and fluorinated aromatics. 1-Fluoronaphthalene can be used to synthesize LY248686, a potent inhibitor of serotonin and noradrenaline uptake^[1].

In Vitro

1-Fluoronaphthalene (3 mg, 24 h) can be oxidized by *C.elegans* ATCC 36112 to form trans-3,4-dihydroxy-3,4-dihydro-1-fluoronaphthalene and trans-5,6-dihydroxy-5,6-dihydro-1-fluoronaphthalene and to form 1-fluoro-8-hydroxy-5-tetralone, 5-hydroxy-1-fluoronaphthalene and 4-hydroxy-1-fluoronaphthalene as well as glucosides, sulfates and glucuronide conjugates of these phenols^[1].

MCE has not independently confirmed the accuracy of these methods. They are for reference only.
