

Oxazole

Cat. No.:	HY-34631		
CAS No.:	288-42-6		
Molecular Formula:	C ₃ H ₃ NO		
Molecular Weight:	69.06		
Target:	Biochemical Assay Reagents		
Pathway:	Others		
Storage:	Pure form	-20°C	3 years
	In solvent	-80°C	6 months
		-20°C	1 month

BIOLOGICAL ACTIVITY

Description

1,3-Oxazole is a biochemical reagent that can be used as a biological material or organic compound for life science related research.

In Vitro

Oxazole and its derivatives are actively involved as building blocks for biochemicals and pharmaceuticals like flopristin and darglitazone. It is also involved in industrial applications such as in dyes, fluorescent brightening agents, textile auxiliaries and pl elastics.

MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
