

6-Bromo-2-pyridinecarboxaldehyde

Cat. No.:	HY-60194
CAS No.:	34160-40-2
Molecular Formula:	C ₆ H ₄ BrNO
Molecular Weight:	186.01
Target:	Biochemical Assay Reagents
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	6-Bromo-2-pyridinecarboxaldehyde is a biochemical reagent that can be used as a biological material or organic compound for life science related research.
In Vitro	6-Bromopyridine-2-carboxaldehyde is used in the study of a rhodium-catalyzed, reductive aldol coupling with divinyl ketones leading to syn α -hydroxyenones. It is also used as a building block for Tris[(pyridyl)methyl]amine ligands. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
