

## Donepezil-d4 hydrochloride

<b>Cat. No.:</b>	HY-B0034S1		
<b>CAS No.:</b>	1219798-88-5		
<b>Molecular Formula:</b>	C <sub>24</sub> H <sub>26</sub> D <sub>4</sub> ClNO <sub>3</sub>		
<b>Molecular Weight:</b>	419.98		
<b>Target:</b>	Cholinesterase (ChE)		
<b>Pathway:</b>	Neuronal Signaling		
<b>Storage:</b>	Powder	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

### BIOLOGICAL ACTIVITY

<b>Description</b>	Donepezil-d4 hydrochloride (E2020-d4) is the deuterium labeled Donepezil hydrochloride. Donepezil Hydrochloride (E2020) is a reversible, selective AChE inhibitor with an IC <sub>50</sub> of 6.7 nM for AChE activity. Donepezil shows high selectivity for AChE over BuChE <sup>[1]</sup> . Donepezil exhibits neuroprotective effect on Aβ42 neurotoxicity <sup>[2]</sup> .
<b>In Vitro</b>	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
