

## D-Panthenol-d<sub>6</sub>

Cat. No.:	HY-B1391S
CAS No.:	2747917-52-6
Molecular Formula:	C <sub>9</sub> H <sub>13</sub> D <sub>6</sub> NO <sub>4</sub>
Molecular Weight:	211.29
Target:	Endogenous Metabolite; Isotope-Labeled Compounds
Pathway:	Metabolic Enzyme/Protease; Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	Dexpanthenol-d <sub>6</sub> is deuterium labeled D-Panthenol. D-Panthenol is the biologically-active alcohol of pantothenic acid, which leads to an elevation in the amount of coenzyme A in the cell.
<b>In Vitro</b>	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
