

Lactate-d₄ sodium

Cat. No.:	HY-B2227BS
CAS No.:	344299-52-1
Molecular Formula:	C ₃ HD ₄ NaO ₃
Molecular Weight:	116.08
Target:	Isotope-Labeled Compounds
Pathway:	Others
Storage:	Solution, -20°C, 2 years

BIOLOGICAL ACTIVITY

Description	Lactate-d ₄ (sodium) is the deuterium labeled Lactate sodium. Lactate sodium is the product of glycogenolysis and glycolysis. Lactate sodium functions in a variety of biochemical processes ^{[1][2]} .
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
