

Permanent Orange

Cat. No.:	HY-D0352
CAS No.:	3468-63-1
Molecular Formula:	C ₁₆ H ₁₀ N ₄ O ₅
Molecular Weight:	338.27
Target:	Biochemical Assay Reagents
Pathway:	Others
Storage:	4°C, stored under nitrogen * In solvent : -80°C, 6 months; -20°C, 1 month (stored under nitrogen)

BIOLOGICAL ACTIVITY

Description	Permanent Orange is a synthetic pigment commonly used in the manufacture of paints and coatings. It belongs to the class of organic pigments and consists of carbon and other elements. Permanent Orange produces a bright orange color that is fade and weather resistant, making it ideal for outdoor applications. It can be mixed with other pigments to produce a range of colors and is compatible with a wide range of binders and solvents.
In Vitro	Permanent Orange is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
