BIOLOGICAL ACTIVITY

Description

D-Galactose-¹³C₆ is the deuterium labeled D-Galactose (HY-N0210). D-Galactose is a natural aldohexose and C-4 epimer of glucose^{[1][2]}.

In Vitro

Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drug^[1].

MCE has not independently confirmed the accuracy of these methods. They are for reference only.
