

Anemonin

Cat. No.:	HY-N0278
CAS No.:	508-44-1
Molecular Formula:	C ₁₀ H ₈ O ₄
Molecular Weight:	192.17
Target:	PKC; NO Synthase
Pathway:	Epigenetics; TGF-beta/Smad; Immunology/Inflammation
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description

Anemonin (Pulsatilla camphor), a selective iNOS inhibitor, is also a PKC- θ inhibitor. Anemonin can significantly inhibit the translation or protein stability of PKC- θ protein. Anemonin also ameliorates dextran sodium sulfate-induced acute ulcerative colitis (UC) in mice. Anemonin can be used in the research of inflammation-related diseases^{[1][2]}.
