Cinobufagin

Cat. No.: HY-N0421  
CAS No.: 470-37-1  
Molecular Formula: C_{26}H_{34}O_{6}  
Molecular Weight: 442.54  
Target: Autophagy  
Pathway: Autophagy  
Storage:
- Powder  
  -20°C  3 years  
  4°C  2 years  
- In solvent  
  -80°C  6 months  
  -20°C  1 month

Solvent & Solubility

In Vitro  
DMSO: ≥ 43 mg/mL (97.17 mM)  
* “≥” means soluble, but saturation unknown.

BIOLOGICAL ACTIVITY

Description
Cinobufagin, a kind of Chinese materia medica with antitumor effect, is widely used in clinical practice, especially in anti-liver cancer. IC50 value: Target In vitro: Cinobufagin inhibited proliferation of cancer cells at doses of 0.1, 1, or 10 μM after 2–4 days of culture. Cytotoxicity of cinobufagin on the DU145 and LNCaP cells was dose-dependent. Cinobufagin increased [Ca2+]i and apoptosis in cancer cells after a 24-hr culture as well as caspase 3 activities in DU145 and PC3 cells and caspase 9 activities in LNCaP cells [1]. Cinobufagin suppresses cell proliferation and causes apoptosis in prostate cancer cells via a sequence of apoptotic modulators, including Bax, cytochrome c and caspases [2].
