Product Data Sheet

Inhibitors

Screening Libraries

Proteins

L-Asparagine-¹⁵N₂ monohydrate

Cat. No.: HY-N0667S2 CAS No.: 287484-32-6 Molecular Formula: C4H1015N2O4

Molecular Weight:

Pathway:

Target: **Endogenous Metabolite**

152.12

Storage: 4°C, protect from light, stored under nitrogen

Metabolic Enzyme/Protease

* In solvent: -80°C, 6 months; -20°C, 1 month (protect from light, stored under

nitrogen)

BIOLOGICAL ACTIVITY

Description L-Asparagine-15N₂ (monohydrate) is the 15N-labeled L-Asparagine. L-Asparagine ((-)-Asparagine) is a non-essential amino acid that is involved in the metabolic control of cell functions in nerve and brain tissue.

In Vitro Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to

affect the pharmacokinetic and metabolic profiles of drugs[1].

MCE has not independently confirmed the accuracy of these methods. They are for reference only.
